

## Our mission

Our mission is to give you more visibility into the financial side of your farm. Spreadsheets are amazing tools that we are huge fans of but they aren't well-suited to the complex task of managing all of the inputs and outputs of a modern farm.

We've built a set of software tools that make it easier for you to track your farm's costs, profits, grain marketing positions, and inventory.

## 4 KEYS TO WINNING THE BATTLE AGAINST UNCERTAINTY

In farming, the main two factors that impact your bottom line are out of your control. The weather and markets.

That shouldn't stop you from operating your farm as the sizable business that it is. You should make probability-weighted decisions in all areas of your farm. Harvest Profit is focused on giving you greater visibility into the numbers side of your farm to help make these tough decisions easier for you.

Make profit-focused land decisions with field-by-field profit tracking.

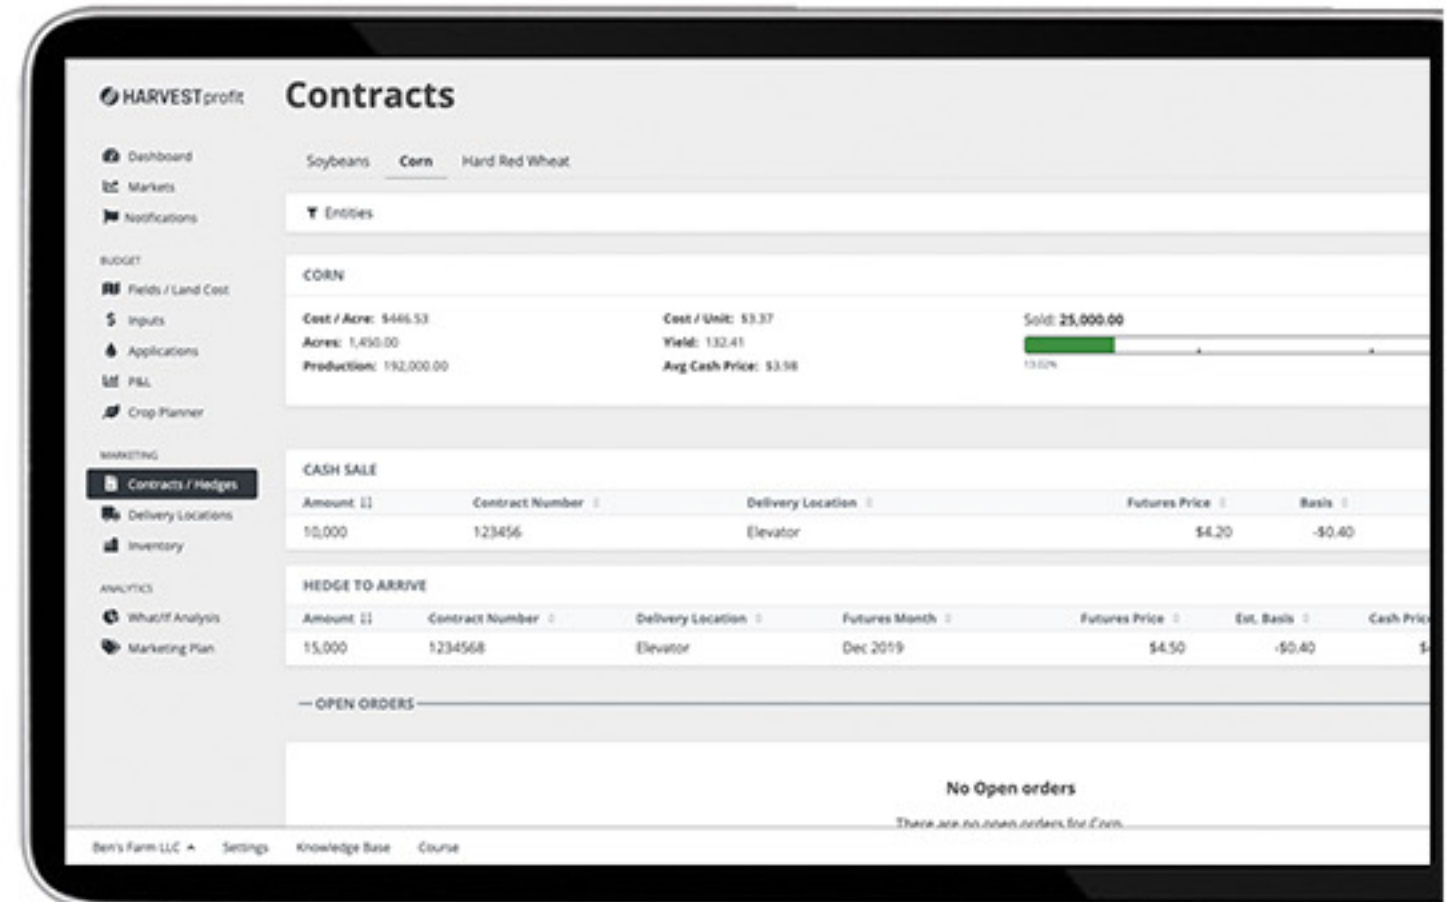

Evaluate crop rotations with our real-time cost of production calculator.

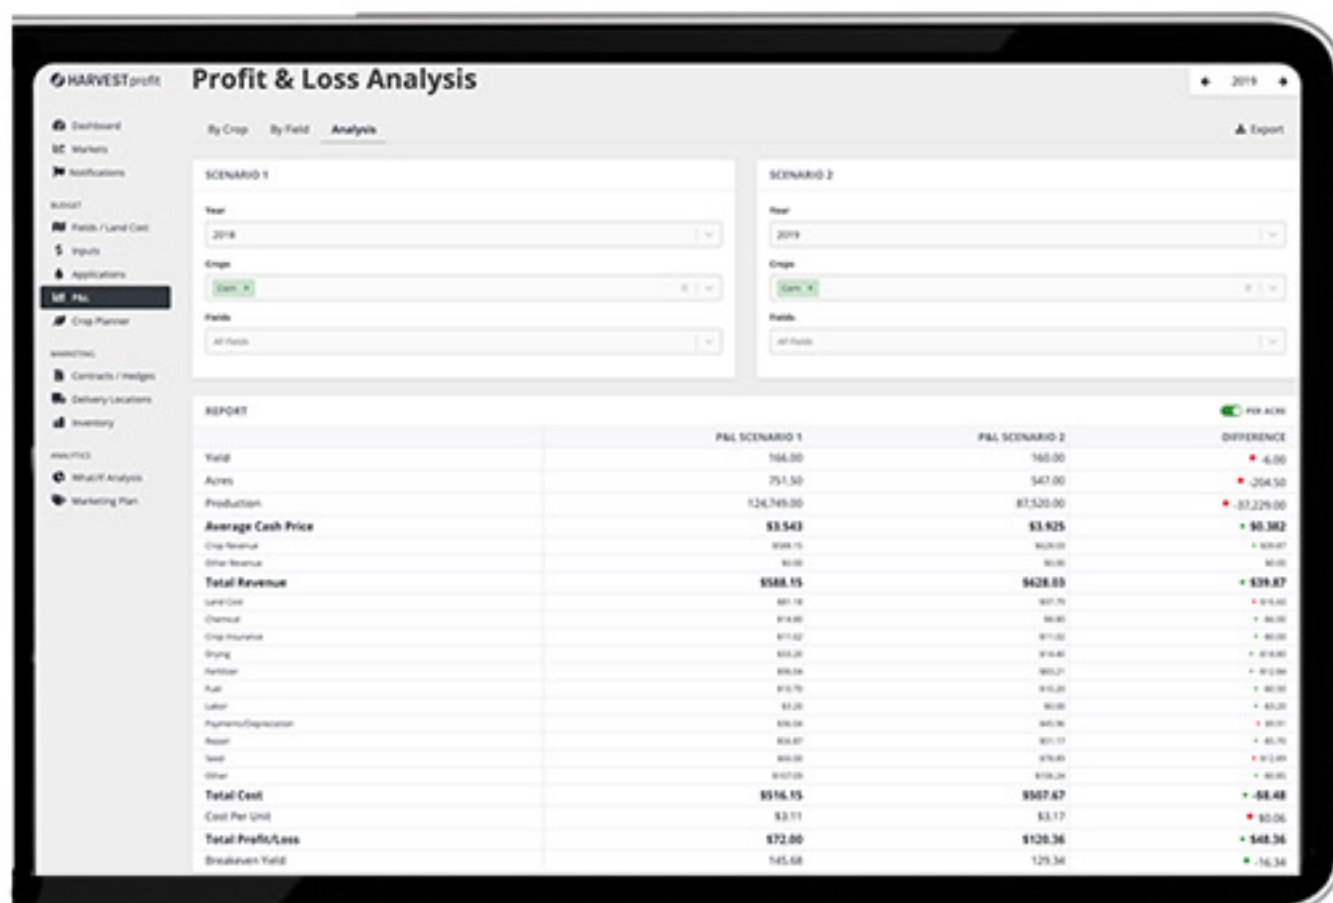

Easily review the impact of market rallies on your profitability and balance sheet.

Learn from past decisions by viewing prior years' data in seconds

- Harvest Profit allows you to give access to multiple users
- Easily download and print reports with one-click .PDF, .XLS, or .CSV exports
- Easily build and share your farm's grain marketing plans
- Collaborate on long-term crop plans with your farm's key decision-makers

**REAL-TIME COST OF PRODUCTION TRACKING FOR YOUR FARM**

*"In regards to bang for your buck, Harvest Profit could help you find leaks and opportunities in your budgeting faster than any program I've used"*

- Steve Marshman, Strathmore, Alberta
