The Power of G5 Advanced Across Your John Deere Fleet

Pass by pass — from tillage to harvest — G5 Advanced delivers season-long value with more precision and automation.

Increase In-Field Productivity & Performance

Level up your G5 displays with G5 Advanced and SF-RTK which provide hands-free guidance and logistics features.

- **AutoTrac Implement Guidance:** Precise implement placement cuts out wide-narrow guess rows and keeps spacing accurate
- **AutoPath:** Save time and make your job easier in complex fields by eliminating guesswork when deciding which guidance line to use
- **AutoTrac Turn Automation:** Consistently complete precise turns at the end of each pass hands-free, reducing operator fatigue
- **Machine Sync:** Unload on-the-go and stress-free, even in tough conditions or with inexperienced operators
- **In-field Data Sharing:** Share as-applied, coverage maps and field totals data

John Deere's Core Precision Technology with G5 & G5^{Plus}

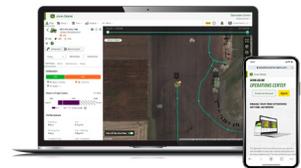

G5 Displays: Analyze field data with a multi-layer view display

StarFire™ Receiver: Maintain guidance lines with greater accuracy

JDLink™ Modems: Stay connected to monitor your operation in real time

John Deere Operations Center: Seamlessly connect all your in-field data
